FACILITY USERS

**278 HOURS**  
INDUSTRY TESTING

SunTrax facility users include a diverse range of transportation innovators, technology developers, and research institutions. These groups utilize the test sectors for vehicle validation, system integration, and performance trials, while the workshop bays support hands-on development, diagnostics and maintenance activities.

Note: Hours provided are for test sector use only.

### TEST SECTOR USE BY TESTING CATEGORY

### WORKSHOP BAY USE

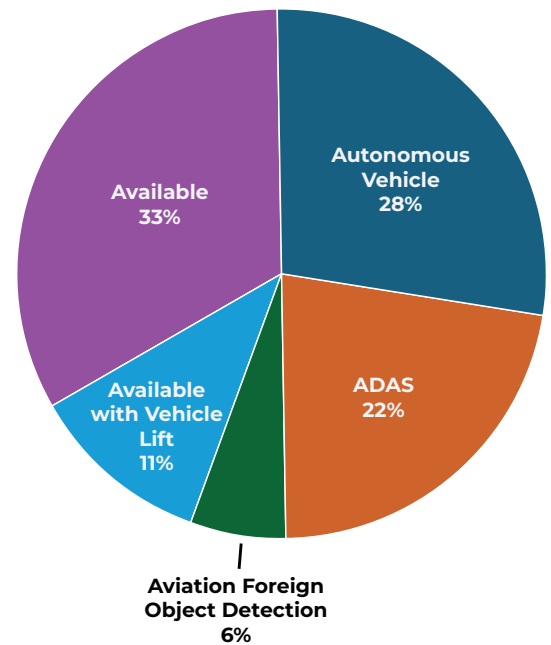

Workshop bays at SunTrax support both short-term and long-term projects, offering flexible space for a wide range of vehicle testing and development needs. These bays are commonly used for vehicle calibrations, maintenance, diagnostics, and on-site adjustments during testing cycles. Their proximity to the infield test sectors allows for efficient integration between lab work and real-time testing.

Note: Hours provided are for workshop bay use based on 10-hour workdays, Mon. - Fri. Extended hours and weekend use are permitted with FDOT approval.

### EVENTS, MEETINGS, AND TOURS

SunTrax focuses on workforce development including FDOT and Industry programs aimed to promote the professional growth, safety, efficiency, and advancement of transportation technology. Tours of the facility are offered to a range of industry, community and government entities on a weekly basis with three goals: workforce development, business development and community outreach.
