TEST SECTOR USE BY TESTING CATEGORY

WORKSHOP BAY USE

Workshop bays at SunTrax support both short-term and long-term projects, offering flexible space for a wide range of vehicle testing and development needs. These bays are commonly used for vehicle calibrations, maintenance, diagnostics, and on-site adjustments during testing cycles. Their proximity to the infield test sectors allows for efficient integration between lab work and real-time testing.

Note: Hours provided are for workshop bay use based on 10-hour workdays, Mon. - Fri. Extended hours and weekend use are permitted with FDOT approval.
