FACILITY USERS

454 HOURS
INDUSTRY TESTING

Note: Hours provided are for test sector use only.

TEST SECTOR USE BY TESTING CATEGORY

WORKSHOP BAY USE

Workshop bays at SunTrax support both short-term and long-term projects, offering flexible space for a wide range of vehicle testing and development needs. These bays are commonly used for vehicle calibrations, maintenance, diagnostics, and on-site adjustments during testing cycles. Their proximity to the infield test sectors allows for efficient integration between lab work and real-time testing.

12
BAYS USED

1,223 HOURS
LAB WORK

Note: Hours provided are for workshop bay use based on 10-hour workdays, Mon. - Fri. Extended hours and weekend use are permitted with FDOT approval.

EVENTS, MEETINGS, AND TOURS

SunTrax focuses on workforce development including FDOT and Industry programs aimed to promote the professional growth, safety, efficiency, and advancement of transportation technology. Tours of the facility are offered to a range of industry, community and government entities on a weekly bases with three goals: workforce development, business development and community outreach.
